

AIM :

Design a Registration Form which includes a multimedia content. On submitting the form, the user should navigate to Home page.

TAGS & ATTRIBUTES :**<form> tag :**

The <form> tag is used to create a HTML form for user input.

<lable> tag :

The <label> element is used to associate a text label with a form <input> field. The label is used to tell users the value that should be entered in the associated input field.

<input> tag :

The <input> tag specifies an input field where the user can enter data. The <input> element can be displayed in several ways, depending on the type attribute.

type attribute :

The type attribute specifies the type of <input> element to display. If the type attribute is not specified, the default type is, text.

<div> tag :

The HTML division tag, called "div" for short, is a special element that lets you group similar sets of content together on a web page.

<select> tag :

The <select> tag in HTML is used to create a drop-down list. This tag contains <option>tag to display the available option of drop-down list.

<option> tag :

The <option> tag defines an option in a select list. This tag can be used without any attributes, but you usually need the value attribute, which indicates what is sent to the server on form submission.

**
 tag :**

 tag is used to break the line and move to the next line.
