

AIM :

Design a web page to display student education details in a tabular format.

TAGS & ATTRIBUTES :**Table :**

The <table> tag defines an HTML table. An HTML table consists of one <table> element and one or more <tr>, <th>, and <td> elements. The <tr> element defines a table row, the <th> element defines a table header, and the <td> element defines a table cell. An HTML table may also include <caption>, <colgroup>, <thead>, <tfoot>, and <tbody> elements.

An HTML table consists of one <table> element and one or more <tr>, <th>, and <td> elements.

tr tag:

The <tr> element defines a table row and information related to each row.

th tag:

The <th> element defines a table header.

td tag:

The <td> element defines a table cell.

Caption tag:

The <caption> tag defines a table caption. The <caption> tag must be inserted immediately after the <table> tag.

Center tag :

The <center> tag in HTML is used to set the alignment of text into the center. This tag does not accept any attribute.

Border attribute :

The HTML border attribute is used to set visible border width to most HTML elements within the body. The border property in CSS is used to style the border of an element. This property is a combination of three other properties border-width, border-style, and border-color.
